

epiSTEME 11

The eleventh biennial international conference reviewing research in science, technology, and mathematics education

 **January 5 - 8, 2027**  **HBCSE, Mumbai, India**

At the intersection of knowledge and pedagogy:

epiSTEME-11 brings together the global research community to explore contemporary challenges in teaching and learning.

What is epiSTEME?

A systematic study of knowledge, and as an acronym, it suggests a meta-perspective on how we teach and learn science, technology, and mathematics.

Engage: Participate in vibrant, interdisciplinary educational research exchange.

Explore: Tackle fundamental questions across cognitive, historical, and technological dimensions of education.

Connect: Join a global community of experts, practitioners, and scholars.

Contribute: Help shape the future of STEM education and reform.

We look forward to welcoming you to Mumbai for a week of stimulating academic dialogue.

Paper submissions are invited for the themes listed below. Further details about the themes are available on the website.
